

ST2 - Keyless Entry System Laptop Management Solution

ST2 Main Features

- ✓ **High grade security system, tamper-proof design.** The usb controller is installed indoors while the proximity readers are installed outside the doors to be controlled.
- ✓ **Specific management software versions for Companies, Commercial Buildings, Residential Buildings and Households.**
- ✓ **Controls and monitors access for two doors, control access schedules and retrieve access records.**
- ✓ **Supports up to 4,000 access credentials.**
- ✓ **USB Interface.** Management operations are performed on a laptop and data is uploaded/downloaded to the controller in a few seconds.
- ✓ **Up to 200 controllers can be managed from one laptop.**
- ✓ **Supports electric strikes and magnetic locks with independent operating voltages.**
- ✓ **Proximity readers can be wired with inexpensive quad cable.**
- ✓ **Various credentials options.** Access cards, proximity keyfobs and proximity cellphone tags.
- ✓ **Door monitoring feature.** Provides input for door contact, beeping when doors remain open, and supports expansion for a secondary external beeper.
- ✓ **Door release feature.** Provides inputs for push buttons that unlock doors for five seconds upon activation.
- ✓ **Smart access schedule feature.** Ability to set user's access with a different weekly schedule for each door.
- ✓ **Visitors feature.** Grant visitors access to selected doors for a period of time/days.
- ✓ **Door unlocking feature.** Keep doors unlocked following a set weekly schedule. Alternatively, conditional unlocking feature allows to keep doors unlocked after the first SmartKey user access to the facilities.
