## ST3 Keyless Entry System Server Management Solution

### ST3 Main Features

- ✓ **Control and monitor user access and exit.** Supports up to 3,570 doors and 60,000 users (expandable to up to 100,000 users).
- ✓ **Flexible, modular and scalable system.** Motherboard controller supports two doors, expandable to up to fourteen doors. Expansion modules available for two, four, six, eight, ten and twelve doors.
- ✓ **Specific customizable software versions for Companies and Institutions, Commercial Buildings, Residential Buildings and Health Clubs.** Full integration with ST4 elevator controller.
- ✓ **Easy Management** via an intuitive graphical user interface.
- ✓ **Advanced integrated security features.** Reports in real time: in cases of door forced, door remaining open, unauthorized access attempts and power loss.
- ✓ **Various credentials options.** Access cards, proximity keyfobs and proximity cellphone tags.
- ✓ **Door release feature.** Provides inputs for push buttons and intercoms interface that unlock doors for five seconds upon activation.
- ✓ **Visitors feature.** Grants visitors access to selected doors for a period of time/days.
- ✓ **Door unlocking feature.** Keep doors unlocked following a set weekly schedule. Alternatively, a conditional unlocking feature allows to keep doors unlocked after the first SmartKey user accesses to the facilities.
- ✓ **Special event feature.** Allows to set door locking/unlocking schedules in advance for parties, holidays, etc.
- ✓ **Setup Wizard.** The system setup can be completed in seconds.
- ✓ **Time and attendance functionality.** Supports access and exit readers to register user's access and exit.
- ✓ **Remote management.** Access over internet via remote desktop solution.
